

SPCS2 Polyclonal Antibody

catalog number: E-AB-18383

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description

Reactivity	Human;Mouse;Rat
Immunogen	Fusion protein of human SPCS2
Host	Rabbit
Isotype	Rabbit IgG
Purification	Antigen affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications

Recommended Dilution

WB	1:500-1:2000
IHC	1:30-1:150

Data

Western blot analysis of K-562 cell Human placenta tissue Mouse adrenal gland tissue HT-29 cell NIH/3T3 cell Rat lung tissue using SPCS2 Polyclonal Antibody at dilution of 1:500

Observed-MW:Refer to figures

Calculated-MW:25 kDa

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using SPCS2 Polyclonal Antibody at dilution of 1:40(×200)

Immunohistochemistry of paraffin-embedded Human gastric cancer tissue using SPCS2 Polyclonal Antibody at dilution of 1:40(×200)

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.

Rev. V1.8

SPCS2 (signal peptidase complex subunit 2), also known as SPC25 or microsomal signal peptidase 25 kDa subunit, is a 226 amino acid multi-pass membrane protein that localizes to both the microsome and the endoplasmic reticulum (ER), and belongs to the SPCS (signal peptidase complex subunit) family. Existing as a component of the microsomal signal peptidase complex which consists of five members, SPCS2 removes signal peptides from nascent proteins as they are translocated into the lumen of the ER. The gene encoding SPCS2 is located on human chromosome 11, which houses over 1,400 genes and comprises nearly 4% of the human genome.
