Recombinant Human CCL1 Protein(Trx Tag)

Catalog Number: PDEH100550

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description | | | |
|---------------------|--|--|--|
| Species | Human | | |
| Source | E.coli-derived Human CCL1 protein Lys24-Lys96, with an N-terminal Trx | | |
| Calculated MW | 27.9 kDa | | |
| Observed MW | 32 kDa | | |
| Accession | P22362 | | |
| Bio-activity | Not validated for activity | | |
| Properties | | | |
| Purity | > 90% as determined by reducing SDS-PAGE. | | |
| Endotoxin | < 10 EU/mg of the protein as determined by the LAL method | | |
| Storage | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 | | |
| | °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20 °C for 3 months. | | |
| Shipping | This product is provided as lyophilized powder which is shipped with ice packs. | | |
| Formulation | Lyophilized from a 0.2 μ m filtered solution in PBS with 5% Trehalose and 5% | | |
| | Mannitol. | | |
| Reconstitution | It is recommended that sterile water be added to the vial to prepare a stock solution of | | |
| | 0.5 mg/mL. Concentration is measured by UV-Vis. | | |

SDS-PAGE analysis of Human CCL1 proteins, 2 µg/lane of Recombinant Human CCL1 proteins was resolved with SDS-PAGE under reducing conditions, showing bands at 27.9 KD

Background

This gene is one of several chemokine genes clustered on the q-arm of chromosome 17. Chemokines form a superfamily of secreted proteins involved in immunoregulatory and inflammatory processes. The superfamily is divided into four subfamilies based on the arrangement of the N-terminal cysteine residues of the mature peptide. This chemokine, a member of the CC subfamily, is secreted by activated T cells and displays chemotactic activity for monocytes but not for neutrophils. It binds to the chemokine (C-C motif) receptor 8.
