# PE Anti-Mouse CD4 Antibody[GK1.5]

Catalog Number: E-AB-F1097UD

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### Description

Reactivity Mouse Rat Host

Isotype Rat IgG2b, ĸ Clone No. **GK1.5** 

PE Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09843D] Isotype Control

Conjugation

**Conjugation Information** PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green

(561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42

nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.

#### **Applications** Recommended usage

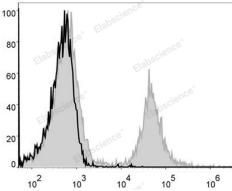

**FCM** Each lot of this antibody is quality control tested by flow cytometric analysis. Please

> check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the

> reagent to obtain optimal results [The recommended concentration is 0.1-1 μg/10<sup>6</sup> cells

in 100 µL volume].

#### **Data**

C57BL/6 murine splenocytes are stained with PE Anti-Mouse CD4 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.

#### **Preparation & Storage**

**Storage** Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

**Shipping** Ice bag

#### **Antigen Information**

**Alternate Names** L3T4;T-cell surface antigen T4/Leu-3;T-cell surface glycoprotein CD4;T4

## **Background**

CD4 is a 55 kD protein also known as L3T4 or T4. It is a member of the Ig superfamily, primarily expressed on most thymocytes, a subset of T cells, and weakly on macrophages and dendritic cells. It acts as a coreceptor with the TCR during T cell activation and thymic differentiation by binding MHC class II and associating with the protein tyrosin kinase, Ick.
