## **Recombinant Human NRCAM Protein (Fc Tag)**

## Catalog Number: PKSH033581

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description				
Species	Human			
Source	HEK293 Cells-derived Human NRCAM protein Gln25-Asn600, with an C-terminal Fc			
Calculated MW	91.2 kDa			
Observed MW	117 kDa			
Accession	AAI15737.1			
Bio-activity	Not validated for activity			
Properties				
Purity	>90 % as determined by reducing SDS-PAGE.			
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method.			
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80			
	°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of			
	reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.			
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.			
Formulation	Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.			
	Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants			
	before lyophilization.			
	Please refer to the specific buffer information in the printed manual.			
Reconstitution	Please refer to the printed manual for detailed information.

## Background

Neuronal cell adhesion molecule(NRCAM) is a single-pass type I membrane protein ,containing 5 fibronectin type-III domains and 6 Ig-like C2-type (immunoglobulin-like) domains. It belongs to the immunoglobulin superfamily. NrCAM is engaged in such biological processes as axonal fasciculation, cell-cell adhesion, central nervous system development, clustering of voltage-gated sodium channels, neuron migration, positive regulation of neuron differentiation, regulation of axon extension, and synaptogenesis. It also may play a role in the molecular assembly of the nodes of Ranvier. NrCAM effects are also linked with different recognition processes and signal transduction pathways regulating cell differentiation, proliferation, or migration.
