Antigen Information

Alternate Names IL-3 Receptor alpha;IL-3Rα

Uniprot ID P26951 Gene ID 3563

Background CD123 is the 70 kD transmembrane α chain of the IL-3 receptor. Alone, CD123 binds

> IL-3 with low affinity; when CD123 associates with CDw131 (common β chain), it binds IL-3 with high affinity. CD123 does not transduce intracellular signals upon binding IL-3 and requires the β chain for this function. CD123 is expressed by myeloid precursors, macrophages, dendritic cells, mast cells, basophils, megakaryocytes, and some B

cells.
